PROFESSIONAL SUMMARY

Azure DevOps Engineer with 4+ years of experience building, deploying, and supporting cloud-based systems on Microsoft Azure. Experienced in cloud migration, infrastructure automation, identity and access management, CI/CD delivery, release governance, and enterprise application support. Strong background working with cross-functional teams to deliver secure, scalable, and cost-effective solutions across Azure, Dynamics 365 Finance & Operations, Atlassian tools, and DevOps platforms. Recognized for practical problem-solving, clear documentation, production support discipline, and a strong interest in using cloud technology to improve business efficiency and support innovation.

CORE SKILLS

Cloud & Infrastructure: Microsoft Azure, AWS, Azure Virtual Machines, storage, networking, VPN, hybrid cloud, monitoring

DevOps & Automation: Azure DevOps, Pipelines, Repos, Boards, Artifacts, CI/CD, GitHub Actions, Git, branching strategies, release management

Infrastructure as Code: Terraform, Ansible, Docker, PowerShell, Bash

Atlassian Ecosystem: Jira, Jira Service Management, Confluence, Bitbucket, Bamboo, Crowd, Fisheye, Crucible

Enterprise Applications: Dynamics 365 Finance & Operations, Lifecycle Services, production support, deployment management

Tools & Systems: REST APIs, SQL, PostgreSQL, Linux, Apache, Jenkins

PROFESSIONAL EXPERIENCE

Group IT Azure DevOps Engineer & D365 Engineer | Midwich Group Plc, Diss, Norfolk, UK

April 2023 - December 2025

- ❖ Supported the Fusion 2 go-live by deploying Dynamics 365 Finance & Operations on Azure, contributing to a smooth transition and improved system performance.
- ❖ Built and maintained secure Azure-based solutions supporting business planning, ERP delivery, and production release activity.
- ❖ Managed build, packaging, and deployment across Dev, Test, UAT, and Production environments using Azure DevOps and Dynamics 365 ALM practices.
- ❖ Implemented CI/CD automation for solution export, validation, versioning, and deployment with Azure DevOps Pipelines and GitHub Actions, reducing manual release effort.
- ❖ Oversaw service updates, system upgrades, and post-release maintenance through Lifecycle Services, helping maintain stability and reduce business disruption.
- ❖ Resolved deployment and runtime issues using Solution Checker, Plugin Trace Logs, Dataverse telemetry, and Azure Application Insights.
- ❖ Managed Git source control, branching strategy, and release processes to support agile delivery workflows.
- ❖ Worked with developers, network engineers, security specialists, and project managers to deliver reliable releases and improve operational confidence.
- ❖ Authored technical documentation and mentored junior engineers, promoting consistent engineering standards and knowledge sharing.

Atlassian Engineer, Train-To-Fit Programme | Experis - Capgemini, Telford, United Kingdom

July 2022 - January 2023

- ❖ Completed intensive training across Jira, Confluence, Bitbucket, and Jira Service Management.
- ❖ Worked with team leads to design and build Atlassian solutions aligned with client requirements.
- ❖ Supported migration of Atlassian systems from on-premises servers to cloud environments, including data verification, testing, and post-migration support.
- ❖ Configured and maintained CI/CD pipelines using Bitbucket and Bamboo, with exposure to AWS, Terraform, and Ansible.
- ❖ Performed system health checks, identified basic performance issues, and escalated findings to senior engineers.
- ❖ Troubleshoot user issues, resolved support tickets, and helped maintain live environment stability.

Azure DevOps Engineer | Microsoft Dynamics 365 Finance & Operations | Teknowledge, Microsoft Vendor, Lagos, Nigeria

July 2019 - July 2021

- ❖ Supported 100+ enterprise Dynamics 365 Finance & Operations cloud deployments across North America.
- ❖ Contributed to 99.9% service availability for business-critical ERP workloads through proactive monitoring, troubleshooting and support discipline.
- ❖ Assisted with the successful deployment and support of Azure-hosted ERP solutions used by thousands of end customers.
- ❖ Collaborated with Microsoft engineering teams to investigate high-severity cloud events affecting enterprise clients.
- ❖ Improved operational efficiency by applying deployment best practices, documentation, and structured issue-resolution processes.

IT Infrastructure Engineer, Hybrid IT & Cloud Transition | Arbico Plc, Nigeria

March 2017 - June 2019

- ❖ Supported on-premises and Azure infrastructure for a 2,000+ employee environment, helping maintain security and availability for critical business systems.
- ❖ Connected on-premises systems to Azure through secure VPN connectivity and supported Sage ERP rollout across multiple business branches.
- ❖ Automated routine administration, system maintenance, and backup processes with PowerShell to reduce manual effort and improve operational consistency.
- ❖ Provisioned and managed Azure virtual machines, storage accounts, and networking resources for project management, finance, and operations teams.
- ❖ Managed Azure Active Directory and role-based access control to improve security and ensure appropriate access to company resources.
- ❖ Collaborated with technical and business teams to implement infrastructure improvements that increased performance, reduced downtime and supported business growth.

EDUCATION

University of Sunderland, UK | B.S. Network Systems Engineering | 2021 - 2022

Allover Central Polytechnic, Otta, Nigeria | HND Computer Science | 2015 - 2017

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Administrator Associate (AZ-104)
- ❖ Microsoft Certified: Azure Solutions Architect Expert
- ❖ Microsoft Certified: Azure Networking Solutions (AZ-700)
- ❖ HashiCorp Certified: Terraform Associate (003)
- ❖ Certified ScrumMaster (CSM)
- ❖ Cisco Networking Academy - CCNA
